a. _____

b. _____

c. _____

d. _____

2. Find out how much energy you use in your meeting place or home. Over two weeks, record what energy you use for things like lights, heating or cooking. Make a plan to reduce the amount of energy you use and put it into action.

Lights – how many lights are there in your house, how long are they on for each day?

Number of lights x number of hours per day x light bulb wattage rating (60W) / 1000 = kWatts

Example:

Number of lights = 8 x number of hours = 5 x light bulb wattage rating (60W) / 1000 = kWatts

8 x 5 x 60 / 1000 = 2.4k Watts per day

x 14 = 33.6kWatts over two weeks
