

Try this simple experiment

Beavers

What to do

A fun extra

You can also use a white carnation – split the stem in two and put one half in a cup of water and the other half in a cup of water with food colouring in it. Half the petals will change colour and half will stay white (this may take up to 24 hours).

More info

Morrisons sponsors the Beaver Gardening Activity Badge and has created some great resources to help Beavers fulfil the badge requirements. Visit scouts.org.uk/morrisons to download the activity pack.

You will need

- Leaves
- Scissors
- Clear containers, or jars
- Water
- Red food colouring
